

SENTINEL® PVC Ventilation

High-quality, Prefabricated PVC Flashing details

DESCRIPTION

Air-Vents help alleviate air pressure and relieve condensation that is directly underneath a mechanically fastened roofing system. The challenge in installing the appropriate roof vents needed while ensuring they are properly detailed to keep water out. Our prefabricated 60-mil SENTINEL® PVC ventilation solutions helps you solve that challenge quickly and easily.

PRODUCTS

Breather Vent: Our breather vent can accommodate up to 5 inch opening and is ideal for small to mid-sized venting needs. This in-stock item is available in white, gray or tan and come in either 1-way or 2-way venting.

RVO Vent with Collar: The RVO combo kit comes completely assembled ready to be installed. We can also provide the membrane flashing only without the metal bin at cover for already installed vents.

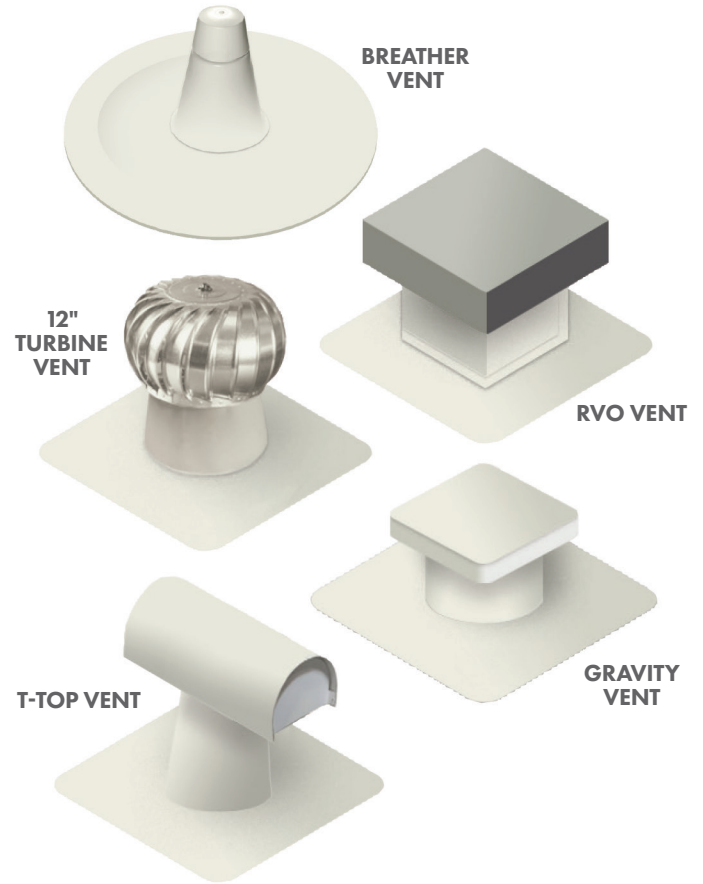

12" Turbine Vent: The 12" turbine vent is available in white and gray.

Gravity Vent: Gravity vents allow heat and stale air to exit the building. Gravity vents are available in three standard sizes in white only.

T-Top Vent: The T-Top Vent allows air to flow freely through the vent while preventing water to infiltrate the structure. T-Top Vents are available in three standard sizes in white only.

STORAGE & HANDLING

Store SENTINEL® PVC Vents in a cool, shaded area and cover with a light-colored breathable, waterproof tarpaulin. Products that have been exposed to the elements must be prepared with PVC membrane cleaner prior to heat welding.
